Getting Cheesy - April 14th & 15th [Getting Cheesy Registration Form](#)

This is a two day class set up to introduce you to the world of cheese making and get your hands on some cheese! You will learn to make soft and hard cheeses. The cheeses will include Chevre or Bondon, Cottage Cheese, a hard cheese such as Gouda, Cheddar or Parmesan, and Mozzarella. We will also make yogurt. Depending on time we may also make other milk products. This class will consist of one weekend. It may be offered a second time if enough people are interested that can not come on this weekend. To really learn the steps and feel comfortable making cheese, you must come two days in a row so you can follow through with the cheese making steps in a consistent fashion. It is my intent to send you out into the world with a new skill under your belt. You will have the knowledge and confidence to begin to make your own cheese at home.

What you will learn: What tools are used in cheesemaking, the ingredients necessary to create most of the artisan cheeses you would wish to make. How to cellar and store cheese without a cheese cave. The basic skills of cheese making and how to make specific types of cheese.
